WORK EXPERIENCE

CodeBoulevard Systems, Lagos, Nigeria— Frontend developer

April 2023 - Present

- Development of a highly scalable Learning Management System (LMS) leveraging Next.js, Typescript, and Redux to enhance online learning experience for global users.
- Code reviews, refactoring, and bug fixes
- Implemented unit testing using RTL and Jest to guarantee code and system behavior alignment; increased overall code coverage by 8% , by making sure code coverage on each unit test is at least above 75%, resulting in an overall system quality and stability.
- Application responsiveness across all devices, on required pages, using SCSS
- Ensure efficient programming structure for easy system maintenance and reduced post-release bug fixes.
- Followed industry standard for smooth development and collaboration with team members

TIIDELab, Lagos, Nigeria— Frontend developer intern

April 2022 - December 2022

- collaborated with a team of software engineers for the design and development of a crowdfunding solution.
- utilized tools like React.js and Vanilla Javascript to develop the core functionalities and improve user experience.
- Streamlined website adaptation and functionality across all user devices for efficient accessibility
- Engaged in user research and sprint planning.
