WORK EXPERIENCE

Sproxil, Lagos, Nigeria— Frontend Engineer

January 2025 - Present

- refactoring old code bases, to be maintainable, by applying best programming practices (DRY, SOC) and also to use modern tools like redux and typescript.
- Participate in sprint planning, system design using flow charts, PRD and product design reviews.
- Collaborating with QA engineers to ensure quality system behaviors

CodeBoulevard Systems, Lagos, Nigeria— Frontend developer

April 2023 - January 2025

- Development of a performant and optimized learning management system (LMS) called [Carmpus](#) leveraging Next.js, Typescript, and Redux to enhance the online learning experience for global users.
- Code reviews, refactoring, and bug fixes
- Performed unit testing using RTL and Jest to guarantee code and system behavior alignment; increased overall code coverage by 8% by making sure code coverage on each unit test is at least above 75%, resulting in an overall code quality and stability.
- Ensure efficient programming structure for easy system maintenance and reduced post-release bug fixes.
- Followed industry standards for smooth development and collaboration with team members using Jira, Youtrack, and others.

TIIDELab, Lagos, Nigeria— Frontend developer intern

April 2022 - December 2022

- collaborated with a team of software engineers for the design and development of a crowdfunding solution.
- utilized tools like React.js and Vanilla Javascript to develop the core functionalities and improve the user experience.
- Streamlined website adaptation and functionality across all user devices for efficient accessibility
- Engaged in user research and sprint planning.
