Lagos, Nigeria | Flexible for remote/hybrid working hours

PROFESSIONAL SUMMARY

Frontend engineer with 4+ years of experience building high-performance, scalable web applications. An expert in React, Next.js, React Native, Expo, and TypeScript with a history of designing complicated system flows. Skilled at transforming business requirements (PRDs) into technical blueprints, and passionate about UI/UX excellence and performance-driven engineering.

TECHNICAL SKILLS

- **Frontend Engineering:** React.js · Next.js · React Native · Expo · TypeScript · JavaScript (ES2020+) · HTML5 · CSS3 · SCSS · Redux Toolkit · React Query · Zustand · Axios · RESTful API Integration · WebSockets · Tailwind CSS · Chakra UI · Material-UI · Evergreen-UI · Responsive Web Design
- **Architecture:** SSR · Frontend Architecture · Flow charts · Figma · Docker · Git · GitHub · GitLab · CI/CD · Versioning
- **Testing & Quality:** Jest · React Testing Library · Cypress · Performance Optimization · Cross-browser Testing
- **AI Tools:** Claude, Copilot, Lovable, GPT
- **Agile & Leadership:** Technical Mentorship · Sprint Planning · Jira · Youtrack · Trello · Zoho

WORK EXPERIENCE

Frontend Engineer

January 2025 – Present | Lagos, Nigeria (Hybrid)

[Sproxil \(sproxil.com\)](https://sproxil.com)

- **Led the frontend** development of the Sproxil Track & Trace platform, offering a **mobile app PWA and web-based solutions with GS1 and NAFDAC services integrations for end-to-end traceability** in the supply chain ecosystem.
- On-site onboarding and training of clients, accelerating product adoption and collecting first-hand user feedback
- Modernization & refactoring of old codebases, migrating into maintainable, typed architectures using TypeScript and Redux. This initiative **reduced production bugs** by 45% and enhanced code readability for the entire engineering team and product reliability for the sales team.
- Built the first version of an **enterprise survey platform with advanced conditional logic**, dynamic question flows, validations, and branching rules, enabling users to create and manage complex surveys; currently for internal use, version two will be launched to the public
- **Built a call center portal with integrated third-party calling capabilities** and custom contact management features, leveraging survey-generated respondent data to handle customer reach and issues.
- Diligently applied Separation of Concerns (SoC) and DRY principles to the frontend architecture, **managing frontend repositories, deployment pipelines, code review processes**, and pull request reviews while providing technical guidance to developers to ensure high-quality, reliable software releases.
- **QA & System Reliability:** Collaborated extensively with QA engineers following rigorous edge-case scenarios and making adjustments that ensured 98.9% stability across critical user journeys (authentication, checkout, and profile management).
- Actively involved in technical planning, feature estimation, and architecture discussions, contributing to the successful delivery of scalable frontend solutions.

Frontend Developer

April 2023 – December 2024 | Germany (Remote)

CodeBoulevard Systems

- LMS Development (campus.io): Engineered 'Campus,' a highly performant and SEO-optimized learning management system, from the ground up. Leveraged Next.js for server-side rendering to ensure fast load times and an excellent user experience for thousands of concurrent students.
- Established a culture of testing within the team by integrating Jest and React Testing Library (RTL), with a policy where each unit test maintained at least 75% coverage, eventually raising the entire system's code coverage significantly and reducing post-release hotfixes.
- Designed complex state management patterns using Redux, facilitating seamless data synchronization between global user dashboards, course progress trackers, and real-time notification systems.
- Collaborated with backend developers to integrate complex third-party APIs (Stripe, Paystack, Twilio), ensuring secure and efficient data handling for fintech and e-commerce clients.

Frontend Developer Intern

April 2022 – December 2022 | Lagos, Nigeria (Hybrid)

TIIDELab

- Worked in an intensive Agile environment to design and develop a crowdfunding platform, focusing on building intuitive donation flows and transparent campaign tracking using React.js.
- Improved accessibility for diverse user groups by ensuring 100% responsiveness across mobile, tablet, and desktop viewports, adhering to WCAG standards for color contrast and screen reader compatibility.
- Engaged in data-driven user research and participated in sprint planning sessions, contributing to the development of user personas that shaped the core product features.

PROJECTS

- **Contact Lens Digital Storefront ([visionwell](https://visionwell.com))** | React.js, TypeScript, Tailwind CSS, Firebase
Developed a comprehensive digital storefront for a contact lens business, integrating real-time inventory management and secure payment gateways.
Key Achievement: Scaled the application to handle instant purchase flows, resulting in a streamlined customer journey that boosted business conversion rates by 20%.
- **The FX Factor (Fintech Hub)** | React.js, TypeScript, Material-UI, SCSS
Engineered a community platform ([thefxfactor](https://thefxfactor.com)) for forex enthusiasts, featuring TradingView live chart integrations and a secure enrollment system for educational courses.
Key Achievement: Optimized the real-time data feed to ensure zero-latency updates for live market charts, supporting a community of over 1,000 active traders.
- **ATS Resume & Portfolio Builder** | React.js, TypeScript
Architected a resume and portfolio builder with a specialized ATS-optimizer feature that scans resumes against specific job descriptions to highlight keyword gaps.
Key Achievement: Successfully implemented a client-side parsing algorithm that helped users improve their ATS score by an average of 35%.

EDUCATION

- Computer Science (B.Sc.) | National Open University, Lagos, Nigeria - (in view, 2027)
- Diploma in Computer Science | Akwa-Ibom State Polytechnic, Ikot-Osurua, Nigeria - (2017)

CERTIFICATIONS.

- AI Career Essentials | ALX (online certification)
- React Native | Udemy (online certification)
- Backend Development | Udemy (online certification - in progress).
